FedHealth

An occupational health and safety data solution.

Federal Occupational Health (FOH) is working to harness state-of-the-art technology to improve the delivery of quality occupational health and safety services. Our FedHealth system replaces paper-based medical charts and manual procedures with integrated health records and processes. These modern tools will not only improve services to our customers and their employees, but will also streamline work activities for FOH's Clinical, Environmental Health, and Employee Assistance/Work Life programs. FOH's cutting-edge, integrated FedHealth occupational health and safety data solution is focused on performance for agency customers and employees.

Intelligent
Encompasses All FOH Services
